

## **Compliance Checklist for Florida Radiation Protection Program Compliance**

---

Use the checklist below to quickly assess whether your facility meets  
**Florida Rule 64E-5.303** requirements for non-medical X-ray registrants:

### **Radiation Protection Program (RPP)**

- ☐ Written on-site Radiation Protection Program is developed
- ☐ RPP is implemented in daily operations
- ☐ RPP is available for inspection
- ☐ Recordkeeping complies with Rule 64E-5.335

### **ALARA (As Low As Reasonably Achievable)**

- ☐ ALARA policy is clearly stated in the RPP
- ☐ Engineering controls (shielding, barriers, equipment placement) are in place
- ☐ Written operating and safety procedures are followed
- ☐ Operators receive appropriate radiation safety training
- ☐ Radiation surveys or evaluations are performed, as required

### **Occupational and Public Dose Control**

- ☐ Worker exposure is assessed and monitored, if required
- ☐ Public access is restricted
- ☐ Warning signs are posted, where required

### **Annual Review Requirement**

- ☐ RPP reviewed within the last 12 months
- ☐ Surveys are performed when changes in equipment
- ☐ Review is documented and dated

### **Documentation available for inspection**

- ☐ Required records are organized and current
- ☐ Staff know where radiation safety documents are kept
- ☐ Corrective actions from past inspections are documented
